

CHANNEL LETTERS & LIGHT BOXES

Channel Letters help easily identify your business to all who pass by, by giving you the most variation in color and shape for your custom logo. No shape is too complicated, and no color is too difficult to match! Choose exposed neon for that nostalgic look, open faced neon letters, front lit letters, reverse lit letters, or front lit/reverse lit letters.

Choose LED components to reduce maintenance costs over the lifetime of the sign.

LED components also reduce your consumption of electricity, which means cost savings over time, and ultimately a more environmentally friendly sign. Channel letters can be mounted on a wall, pole, or pylon sign.
